

# Quarterly Population Highlights

*A release from the Province of British Columbia's central statistical agency*

**REFERENCE DATE: OCTOBER 1, 2014 | ISSUE #14-03**

## B.C. HIGHLIGHTS:

The population of B.C. was estimated at 4,657,947 as of October 1, 2014, growing by 26,645 persons in the third quarter of 2014 (an increase of 0.6% from July 1, 2014). Combined net migration from all sources (interprovincial and international) was 22,969. Net interprovincial in-migration totalled 4,216 persons in the third quarter, a notable increase from the second quarter of 2014. Net international migration accounted for over 70% of the third quarter gain, in large part due to the net change in non-permanent residents. The other component of population growth was a natural increase (births minus deaths) of 3,676 which accounted for 14% of third quarter growth.

B.C. Population July 1, 2014	4,631,302
Interprovincial migration	+ 4,216
Add interprovincial arrivals	+ 14,552
Minus interprovincial exits	- 10,336
International migration	+ 18,753
Add immigrants	+ 7,985
Minus total net emigrants	- 3,560
Net change in non-permanent residents	+ 14,328
Natural increase	+ 3,676
Add births	+ 11,664
Minus deaths	- 7,988
B.C. Population October 1, 2014	4,657,947

## THE LAST TWELVE MONTHS:

B.C.'s total population increase over the twelve months ending October 1, 2014 was 54,711 persons (+1.2%), largely due to international migration. Immigrants (+36,508) and non-permanent residents (+14,012) continue to be steady providers of population growth for the province. Interprovincial migration accounted for a net gain of 6,765 persons from October 1, 2013 to October 1, 2014. Total net migration accounted for nearly 81% (+44,066) of the population growth since October 1, 2013. The remainder was due to the natural increase (+19%; +10,645).

## NATIONAL OVERVIEW:

The population of Canada grew by 135,415 persons (+0.38%) to 35,675,834 during the third quarter of 2014. Leading the growth at the provincial and territorial level were the Yukon (+0.68%) followed by Alberta (+0.59%) and British Columbia (+0.58%). The populations of all remaining provinces and territories saw smaller population increases with the exception of Newfoundland and Labrador which reported a small decline.

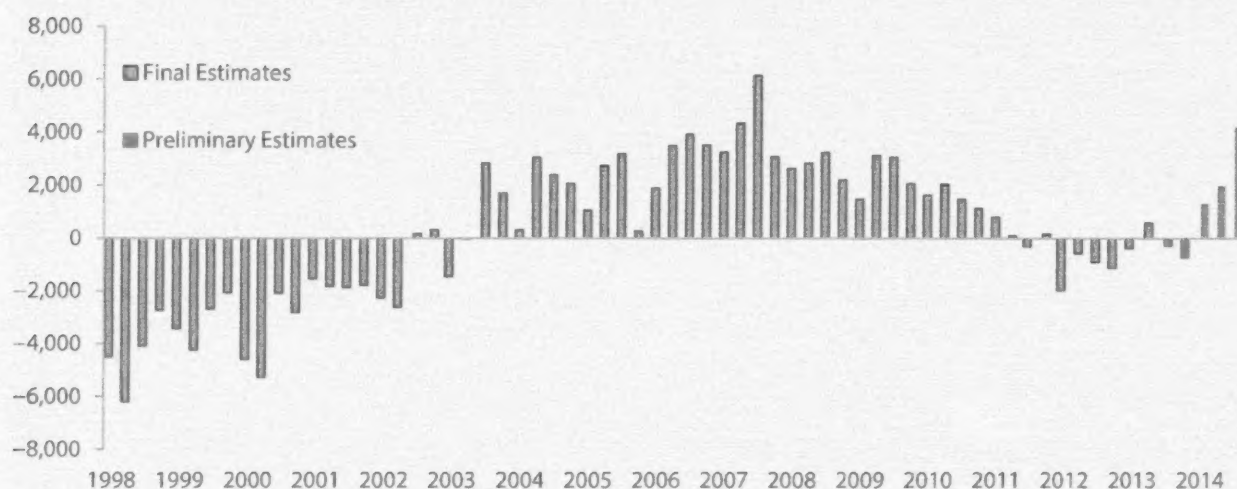

## THIRD QUARTER INTERNATIONAL MIGRATION:

Net international in-migration (*immigrants plus the net change in non-permanent residents plus returning emigrants less emigrants and persons temporarily abroad*) totalled 18,753 in the third quarter, an increase of 9.7% (+1,662) from the same quarter in 2013. While the total number of immigrants arriving in B.C. from July 1 to September 30 (7,985) was down compared to the same three months in 2013 (8,928), the net change in non-permanent residents (+14,328) was noticeably higher than in the third quarter of 2013 (+11,723) and drove the increase. As for persons leaving B.C. for international destinations in the third quarter, an estimated 3,880 left on a permanent basis while 1,714 were away temporarily, unchanged from the same period in 2013.

## THIRD QUARTER INTERPROVINCIAL MIGRATION:

British Columbia was one of three provinces and territories that reported a net gain in population (+4,216) from other Canadian jurisdictions in the third quarter of 2014. In B.C. an inflow of 14,552 persons was offset by an outflow of 10,336. British Columbia's net exchange with Alberta was positive, with an estimated 640 more persons leaving Alberta for B.C. than those going to Alberta from British Columbia. In addition, B.C. reported positive net in-migration from Ontario (+903), Manitoba (+874), Quebec (+811) and Saskatchewan (+747). Alberta was the biggest net recipient in the third quarter of 2014 with a net gain of 6,320 interprovincial migrants, followed by B.C. with a net gain of 4,216. The Yukon was the only other jurisdiction to post a net gain (+114).

## B.C. NET INTERPROVINCIAL MIGRATION BY QUARTER, Q1 1998 TO Q3 2014

### DID YOU KNOW?

According to the 2011 Census, there were a total of 1,764,637 households (occupied private dwellings) in British Columbia. Average household size in B.C. has been shrinking gradually over the past number of decades. The average number of persons living in a private household was 2.45 in 2011, compared to 2.7 persons in 1981. Note that households are different from families, in that people living in the same household do not have to be related to one another. In 2011, there were 1,238,155 families living in private households. Information about households is useful for conducting market research and formulating certain government policies.

BC Stats produces household projections annually by B.C. sub-provincial areas. For more information on these projections see <http://www.bcstats.gov.bc.ca/StatisticsBySubject/Demography/Households.aspx>.
